SUMMARY

Full-stack developer with hands-on experience in the MERN stack (React.js, Next.js, Node.js, Express.js, MongoDB) plus SQL for relational data needs. Delivered full-stack applications during internships and independent projects, covering frontend UI, backend APIs, and database architecture

SKILLS

- **Frontend:** HTML, CSS, React.js, Next.js, Astro.js, Tailwind CSS
- **Backend:** NodeJS, Express.js, REST APIs, MongoDB, MySQL, JWT
- **Programming Languages:** JavaScript, TypeScript, Python, SQL
- **Cloud:** Git, Docker, AWS S3 & EC2

EDUCATION

SSM College of Engineering

Bachelor of Engineering – Information Technology; GPA: 74.5%

Namakkal, India

July 2022 – June 2026

EXPERIENCE

Venusaur Technologies

Erode, India

Software developer (intern)

Apr 2025- M 2026

- Deployed a full-stack fashion e-commerce platform using Next.js, React.js, Node.js, Express.js, and MongoDB, supporting 50+ product listings across multiple categories with a scalable, maintainable MERN stack architecture.
- Built a high-performance product catalog with search, filtering, sorting, and pagination capabilities, reducing average product discovery time by 30% and improving overall user experience.
- Integrated Razorpay payment gateway processing 100% automated payment verification with webhook handling, achieving real-time order confirmation and eliminating manual payment reconciliation.
- Built a centralized admin dashboard enabling real-time management of products, inventory, categories, users, and customer orders, improving operational efficiency across business functions.
- Created a responsive admin dashboard for managing products, inventory, categories, users, and customer orders through a centralized interface.
- Implemented inventory tracking and stock management features, reducing overselling issues and improving product availability visibility.
- Optimized application performance by leveraging React Hooks, component reusability, lazy loading, and API optimization, improving page load speed by approximately 30%.

PROJECTS

- **AI Chat bot (MERN Stack, Open AI):** Developed a full-stack AI chatbot using the MERN stack integrated with OpenAI API to provide intelligent conversational responses. Implemented secure authentication, stored chat history in MongoDB, and built a responsive real-time chat interface.
GitHub: https://github.com/vinson1906/Student_Job_Assistant
- **Hipic Tv Product Showcase Website:** Worked on a TV-based product showcase application for displaying products, banners, and promotional content. Built content management features for updating displayed information and implemented layouts optimized for large-screen devices.
